COHASSET WHIST CLUB.

In a country town in the winter the people are in a measure shut off from the rest of the world, and seek some means of recreation to make the monotony of indoor life more agreeable. The CoHASSET WHIST CLUB is the outgrowth of such a desire on the part of some of our young people and has furnished an excellent means of sociable intercourse during the winter.

Now that the long winter evenings are past and the necessity for the meetings no longer exists, the club determined to wind up its meetings in a fitting manner. Accordingly the time was set, committees on entertainment, mental and physical were chosen, and suitable preparations were made for a good time. Wednesday evening the club with friends, making a party of twenty-eight, assembled at Atlantic Music Hall. For the first part of the evening an entertainment had been provided consisting of the male quartet, "Oh, who will o'er the downy mountain top?" by Messrs. Geo. L. Collier, E. P. Collier, E. H. Towle and C. Lothrop; song from Isolante by Miss L. C. Bates; reading by Mrs. Harry Meredith "The Heathen Child" illustrated by tableau in which Geo. L. Collier took the part of the "Heathen in China," E. H. Towle of "Bill Nye" and C. Lothrop of "Truthful James"; song by Mr. Lothrop, "Phyllis Sentinel I," and on an encore "The Midshipmite." At the close of the entertainment a game of whist for championship was played by Miss J. N. Collier, Mr. Lothrop, Miss Sarah Collier and Mr. Collier, the two latter coming off victorious and receiving as prizes certificates appropriately decorated.

The entertainment then passed into the hands of the supper committee. In the decorations of the tables cards were called into play largely, groups of them being arranged on the table cloths in various shapes. The supper committee were distinguished by badges of cards on white silk and the ladies of the committee were further adorned with châtelaine pins made also from cards. The tables were arranged in the form of a T and were lighted at each end by brass candelabra. On as many of the dishes as possible devices of cards had been worked out, and each guest card bore one of the fifty-two varieties of the pack.

After the various good things had been discussed, Miss J. N. Collier, toast mistress for the evening, read the toasts with great effect. The ladies, the press, cards, and our guests, then responded to respectively by Mr. Collier, Mr. Lothrop, Mr. Towle and Mr. N. H. Tower. The remainder of the evening was devoted to dancing and bouquet each.

WEST SCITUATE.

If any one has lost any measles and is desirous of recovering them we would recommend a visit to this vicinity.

They are straying around in a perfectly reckless manner and perhaps lost property might be identified.

The Rev. Mr. Quimby of Charlton,

will occupy the desk at the Universalist church next Sabbath. Mr. Quimby has an excellent reputation as a

clergyman, and appears as a candidate.

Parish meeting stands adjourned to Monday evening, May 7th.

OUR SPORTSMEN.

With the death of Capt. Samuel Hall CoHASSET loses a familiar figure from her streets. Capt. Hall died within a few months of his 85th year; his life covered the greater part of the history of CoHASSET as a town, and in him we lose one more of the storehouses of CoHASSET's unwritten history. His active life was spent on the sea in foreign and coasting voyages and the flavor of the sea always remained with him. His speech was interlarded with nautical phrases and his pathetic observance as he took to his bed for the last time, "I'm afraid" and "I'm going astern" were characteristic of the man. Although he retained full possession of all his powers up to his last illness, Capt. Hall was twice married, his first wife being Harriet Wildo. He leaves a wife and one son, Capt. John Hall, and a sister, Mrs. Mary Nichols.

ONIONS RAISED ON PHOSPHATE ALONE.

SUNDENHILL, MASS., April 8, 1882.

Last year I sowed three and one half acres to onions using 1,600 pounds of Brad-Webb's phosphate, and the yield was 635 lbs per acre. No other man ever made 100 bushels per acre from these three and one half acres for seventy cents per bushel, and the whole amounted to 900 bushels. Mrs. Merritt has a popular clerk for many years in the leading houses of Cottage City, and last summer was at the Sea View House.

On Tuesday, a fire was noticed by

Geo. Webb's barn, and she gave the alarm,

when some took it out. It was

Mr. W. Threlkeld's house, that morning

caught from them, and would have

proved a very bad conflagration had it

not been for Mrs. Merritt, for there

was no one at home at Mr. Webb's.

ABOUT TOWN.

The schooner Henrietta Frances arrived here from Gloucester the 1st and left the 3rd, for the fishing grounds.

Schooner Emma Day, Capt. Derry arrived the 1st with a load of coal for Tower, Bro. & Co.

Mr. John Wilson leaves the employment of Mr. Joseph Bates to-day. Arthur Litchfield of Beechwood will take his place on the express.

Sheet-and-pillow-case party at the Hall last evening. Full account in our next issue.

Capt. Harry P. Snow arrived home on Saturday the 28th ult.

Geo. E. Crawley, Esq., has taken Mr. Joseph Bates' residence on Jerusalem road for the summer.

The new residence of Messrs. Asa Potter, Marcelus Walker and Henry Tolman on the Jerusalem road are nearly ready for occupancy.

Letters remaining in the Post office the 1st of May—C. S. Bates, John N. Adams, Mr. C. Bates, W. H. Collier, Mrs. I. Gomers, Jose Maria Fagundes, Thayer Bros., Anna N. Webster, Carlos H. Young.

A meeting of the trustees of the Public Library was held Thursday afternoon. The by-laws were amended so as to make a quorum of the board consisting of a majority instead of two thirds of the board. A list of books was drawn up for addition to the library.

Attention is called to the advertisement in this issue of the dramatic entertainment at the Town Hall, the 16th.

The sloop yacht Breeze, formerly owned by John Quincy Adams, has been purchased by Mr. N. C. Nash of Arlington. She is now undergoing extensive repairs at the Cove. Her owner has expended some \$400 on her.

We advertise in another column a fine young oxen for sale. Be sure and read the same and if in want of a nice pair, consult the owner.

There is advertised in this issue an auction sale of four houses belonging to the Scituate Savings Bank. Please read and remember the date of sale.

Mrs. Mary Bates has returned to her residence on Willow street, after spending the winter with her brother, Wm. H. Osborne, Esq., of East Bridgewater.

Mr. George Venetchi has recently plowed the land around his house, and smoothed it off making a very fine lawn, and thereby greatly improving the appearance of the place.

Mr. J. T. Cashman is working on government work at Block Island, where, with a gang of quarrymen, he is building a sea wall, under the contract of Chas. H. Edwards of Quincy, which calls for 750 tons of rip-rap granite.

Feminine Beauties.

The newest version of the wife's collar has three piping of cream silk inside the plain upright band of velvet, which is not generally becoming. A waistcoat of velvet with a puff of silk quills or a cascade of lace down the center is worn with this collar as frequently as possible.

Ordinary house dress, worked in wool and trimmed with bands of lace, is worn in England for dress occasions at present, and is found to wear better than silk or satin sheeting.

The full plain-clothing blouse gauze also is a trimming for short skirts and as a border to it. Those with ruffled edges are particularly pretty.

If you will hang baskets with artificial flowers, you may make them hard, bright and prettily infectious by dipping them in a warm enamel solution of borax and varnishing them when dry with crystal varnish.

Horn and metal buttons covered with a fine check have come into use for checked dresses.

Flax lace has the design wrought in white cotton in the newest patterns.

Two-colored ribbons have returned again and are presented altogether by those who have any eye for color. It is almost impossible to use them so that they will not be picturesque, and when one side is satin and the other plain, really amazing things may be done with them.

A beauty for matching colors and designs has sprung up in the heart of the dressmakers. For instance, corn flower blue, green and silk brocaded with over flowers, and cherry-colored cashmere and silk brocaded with cashmere are in one dress.

Softness is a prominent characteristic of the Summer silks and woolen goods.

Satin cords braided into rather intricate designs are used as the heading for other trimmings on rich costumes.

Scotch gingham are made up with basques of chintz matching the prevailing colors of the plaid. These basques have a waistline of the plaid and are more becoming than those in which the pattern is cut up by seams.

The fashion of drawing the glove over the sleeve goes out with the Spring, and the cooler method of wearing it close to the arm is again adopted. English gloves with close wrists are again in vogue, and are liked by women with pretty arms who find the musquinate glove too straight.

Now's calling and comb's hair combs in white, buff and gold are among the most attractive things in the shoppe. The color is introduced either in gold thread wrought into the lace or in embroidery or in silk stiffs used for panels.

Rodgers, the Princess of Wales' tailor, is trimming plain skirts with embossed braid, putting it on in vertical as well as in horizontal bands, and either matching the material or contrasting with it. Yachting suits of the same dress are trimmed with red and white braid. White serge is ornamented with disks of red braid.

Remarkable Development of Madagascari.

The embryo was formed in August of last year, by the Queen of Madagascari, for the purpose of effecting a peace, an amicable settlement of the difficulties existing between the Island kingdom and France, chief of which was her prohibition of sales of land to French colonists. They were instructed to visit France, England, Germany and the United States, and to establish, if possible, friendly relations with those governments. The special object of their visit to this country was to further the ratification of the treaty between the United States and Madagascari, and to promote commercial intercourse between the two nations. Madagascari is by no means so insignificant a portion of the earth's surface as might be presumed from the small amount of current information concerning it. It is one of the biggest of islands, considerably larger than Great Britain and Ireland, and the population is estimated at over 4,000,000.

The work of the London Missionary Society, and other organizations, which has been in progress there some 60 years, has met with wonderful success. Especially during the last 20 years has the lesson been working additionally, until now the pagan worship has been abandoned for Wesleyan Methodism by the better classes of the Hovas, the ruling tribe. Of course, among many of the natives the purity of the 12 gins god and idols is acknowledged, but these deities are banished from the court, and Mandy and Nekyby hymns have taken the place of the unchristianized orgies that formerly prevailed. It is claimed that there are present in the island 244,000 native adherents to Christianity with 21,000 native preachers. Schools have also been established on an extensive scale and some 45,000 Madagascari natives are drilled in the mysteries of English grammar. The results of all this have been to change the mode of life, and now the giant lads of the wilderness are literate, and there exists a demand for polished shirts, plug hats, patent leather shoes and other commodities of a civilized community. This has arisen an opportunity for trade. England gets the bulk of it at present, but it rapidly developing, and there is no good reason why America with a proper amount of enterprise should not have their share of it.

IT WORKS LIKE A CHARM.
